PHDFWF – JAQUAR MOBILE MEDICAL VAN PROJECTS

Technology is transforming the way the healthcare industry provides medical and other health-related services to many patients across the world. Previously, people living in isolated, rural, and underserved communities had no access to doctors, dentists, and other medical practitioners because they had no clinic or hospital to go. Consequently, they're deprived of the care and health services whenever they need it. This is where mobile medical vans come to the rescue. These mobile medical vans are equipped with Routine Diagnostic equipments and reagents, instruments for clinical examinations like B. P. Stethoscope and diagnostic kits, Oxygen Cylinder, E.C.G machine, Blood test (sugar, cholesterol, creatine, Uric acid, SGOT, SGPT, haemoglobin, phosphorus, sodium potassium, total protein, calcium OCPC etc.) and all necessary medicines. The medicine is given free of cost to all the patients. Spectacles are also provided as per the need of the patient.
